- The main aim of the project is the development and improvement of curricula for the education of professionals in the Western Balkans (Serbia and Bosnia and Herzegovina) who will solve problems of soil erosion control and protection against torrential floods in compliance with EU directives
- In order for graduates to have the knowledge necessary for soil and landscape protection and regulation of torrential catchments that is as good as the knowledge of engineers in EU countries, it is necessary to improve and modernize the existing study programs

- During the implementation of projects, teachers at the universities of the partner countries through training will gain additional knowledge on the basis of which will be able to implement the enhanced program

- Training of teachers will be done through study visits to EU universities, as well as during the stay of teachers from these universities at the universities of partner countries
